## PROFESSIONAL SUMMARY

---

Flutter Developer with 3+ years of experience delivering production-grade cross-platform applications for Android, iOS, Web, and Smart TV (Samsung Tizen). Led end-to-end development of a live OTT streaming platform serving MENA markets, with hands-on expertise in DRM video integration, adaptive playback, 10-foot TV UX, and large-scale media delivery. Proven record of launching 5 high-rated apps independently (avg. 4.8 stars) and driving measurable outcomes — 25% improvement in user engagement and 30% faster project delivery. Passionate about clean architecture, performance optimization, and seamless user experiences.

## TECHNICAL SKILLS

---

**Languages & Frameworks:** Dart, Flutter, BLoC, Provider, GetX, REST APIs, GraphQL

**Platforms:** Android, iOS, Web (Responsive), Samsung Tizen TV, Desktop

**Specializations:** OTT/Streaming, DRM Video, 10-Foot TV UX, Custom Painter, Speech-to-Text AI

**Tools & Workflow:** Firebase, Git, CI/CD, Postman, Figma, Agile/Scrum

**Backend (Exposure):** Node.js, REST API design, Authentication flows, Media delivery pipelines

## PROFESSIONAL EXPERIENCE

---

**Flutter Developer** | [Enpointe IO](#) | Goregaon West, Mumbai *Oct 2025 – Present*

*Entertainment software company specializing in OTT streaming platforms.*

- Led end-to-end development of Slasher, a horror-focused OTT platform targeting MENA audiences, built with Flutter for Android, iOS, Web, and Samsung Tizen TV
- Engineered custom TV-focused UI with remote navigation optimization, focus management, and smooth 10-foot UX — a niche skill rare in the Flutter ecosystem
- Integrated secure DRM video streaming with adaptive playback and performance optimization for large-scale media content delivery
- Implemented full authentication flows, subscription models, and secure API integration with backend media delivery pipelines
- Managed Samsung Seller Office deployment including Alpha & Beta testing builds (.TPK), device group configurations, and multi-country beta rollout
- Troubleshoot Tizen firmware, API-level compatibility, and release-mode deployment issues to ensure compliance with regional store requirements

**Flutter Developer** | [WatchYourHealth.com](#) | Thane, Mumbai *Apr 2024 – Oct 2025*

*Digital health platform delivering innovative healthcare solutions.*

- Developed a comprehensive Flutter Web Responsive application with a companion mobile app, ensuring seamless UX across all screen sizes and platforms
- Created complex, high-quality UI designs using Custom Painter to achieve interactive, pixel-perfect interfaces
- Launched two products from scratch — Genie App for Jaslok Hospitals and a Health Insurance Broker app for Septa Health Solutions — collaborating with cross-functional teams from concept through deployment

**Senior Product Engineer** | [Kampd](#) | Mumbai, India *Jun 2022 – Oct 2023*

*User engagement and communication platform.*

- Built a complete real-time chat module for the company's Flutter app using BLoC architecture, improving performance and scalability
- Contributed to key UI decisions that directly improved user engagement metrics within the app
- Refactored legacy codebase to improve readability, maintainability, and adherence to clean architecture principles
- Implemented role-based access management for user-type-specific features across the platform

## INDEPENDENT PROJECTS

---

**Creator & Full-Stack Developer** | **AudioText AI** | Mumbai, India *Sep 2023 – Jan 2024*

*AI-powered speech-to-text app for working professionals and students.*

- Designed and developed the entire product solo — backend API server and Flutter mobile frontend — from architecture to App Store deployment
- Implemented in-app recording, AI transcription, and multiple text formatting/styling options for ease of use

## KEY ACHIEVEMENTS

---

- **Enhanced User Engagement** — Improved app user engagement by 25% through targeted UI/UX redesign and feature enhancements
- **5 Successful App Launches** — Launched 5 production apps independently, averaging 4.8-star ratings across the App Store and Google Play
- **Full-Stack Ownership** — Sole developer for AudioText AI — designed, built, and shipped 100% of backend and frontend independently
- **Accelerated Delivery** — Increased project delivery speed by 30% through efficient coding practices and reusable component architecture
- **Smart TV Pioneer** — One of few Flutter developers with proven production experience on Samsung Tizen TV (OTT/DRM)

## EDUCATION

---

**Higher Secondary Certificate (HSC)**SVIS and College, Mumbai

**Secondary School Certificate (SSC)**St. Joseph's High School, Thane
